E-mail: inquiry@neovitagroup.com

JAVA TRAINING COURSE

The *Java™ Training Course* provides students with information about the syntax of the Java programming language; object-oriented programming with the Java programming language; exceptions. Programmers familiar with object-oriented concepts can learn how to develop Java technology applications. The course uses the Java™ 2 Software Development Kit (Java™ 2 SDK).

Students who can benefit from this course are programmers who are interested in adding the Java programming language to their list of skills and students who are preparing for the Sun Certified Programmer for Java™ examination.

ABOUT THE INSTRUCTOR

Bernie Mantos, has more than six (6) years working experience as a Software Engineer/Consultant. He has an in-depth experience in developing business logic functionalities in Systems Application and Financial System using Java/J2EE (3.75 years), Visual Basic 6(2.5 years). Have done System Design, Database Designing, Project Integration/Implementation and System and Unit Testing and has thorough understanding of SDLC process. Some projects completed are Accounting, Inventory System and Payroll System. He is a Sun Certified Java Programmer with a Bachelor of Information Technology degree.

Skills Gained

Upon completion of this course, students should be able to:

- Create Java technology applications that leverage the object-oriented features of the Java language, such as encapsulation, inheritance, and polymorphism
- Execute and run a Java technology application
- Use Java technology data types and expressions
- Use Java technology flow control constructs
- Use arrays and other data collections
- Implement error-handling techniques using exception handling

Bonus Tracks

- Java Database Connectivity (JDBC)
- Database (MYSQL)
- Structured Query Language (SQL)

Call us now at
