Computer Network and Security Training

This training program aims to teach participants on the basic of computer networking and network security. Knowledge workers of today need to herald in an integrated world core of which is a network environment. However, this training will also be useful to the average home user who wants to optimize resource utilization, share infrastructure and make the best use of technology.

For those who have the entrepreneurial spirit, this training will be most valuable if your planning to put up your own CyberCafe. You will learn the hardware and software needed to start your small business plus security knowledge to help you maintain and develop it further.

However, even if you are somebody who just banks online, accesses work online, travels extensively and stay connected, logs onto wireless networks, subscribe to a broadband connection or use a computer system at work /home, you also definitely need this training to help you stay abreast in this networked world.
