OVERVIEW

Flavors covered - Solaris / Linux.

This course assumes no prior knowledge of Unix.

Details: This course is designed to take the confusion and frustration out of working with Unix. The series of classroom labs, which run in a real-world UNIX environment, are structured to allow you to learn by doing. The hands-on labs progressively build your UNIX knowledge and command skills in a clear and concise manner.

Working in a controlled UNIX classroom environment with an expert instructor, you will learn UNIX concepts, commands, terminology, file system structure, directories and file manipulation tools. You will receive professional tips and techniques that will help you build your UNIX confidence and skills.

UNIX System Training

Course Contents

ABOUT THE INSTRUCTOR

Ramer Ortega has an extensive background in Unix Operating System. He has been using it for more than ten (10) years now under different roles such as software developer, systems administrator, and senior systems architect.

A Computer Science graduate from AMA University currently working in one of the biggest software development company in Singapore. Ramer's advanced expertise on the system and extensive hands-on experience will definitely benefit all participants as he can guide them from basic to advanced usage of Unix system. Besides being a well-qualified instructor on the subject, participants can also rely on him as a resource person for any on-going Unix issues that they might be encountering.
