NeoVita introduces Computer Network and Security Training

A new training program called COMPUTER NETWORK AND SECURITY TRAINING was re-

cently launched by NeoVita Computer Centre. This training program was purposely aimed for professionals working here in Singapore. This is open to all, so everyone is heartily invited.

NeoVita is very much aware of the hottest start-up business now in the Philippines which is the "CyberCafe" or "Internet Centre".

With this forehand knowledge on the popularity and viability of starting up this type of business, NeoVita purposely came out with this computer network and security training with the aim of giving technical knowledge to those who are interested in going to this type of business.

Setting-up a cybercafe business does not only entail having start-up capital but also having technical orientation to make the business profitable. By preparing the would-be entre-

preneurs or investors in the technical requirement of this type of business, it would be helpful for them to assess some factors that would affect the operation of the business.

Besides targeting aspiring business owners, NeoVita also aims to attract working professionals to have a technical know-how on computer network and security. Working environment nowadays is normally wired and connected. Employees with practical as well technical knowledge on computer network and security would have an advantage over those who do not have.

For queries and other details of this program call Tel. 65345830 / HP 91501132.
